

2012 - 2013

USC GLOBAL HEALTH LECTURE SERIES

FALL 2012

9/4 - The World on a Plate: A Global Photographic Feast

Peter Menzel & Faith D'Aluisio – Co-Producers, Hungry Planet: What the World Eats
12:00 p.m. – 1:30 p.m. @ Ronald Tutor Campus Center - The Forum

Join photographer Peter Menzel and Faith D'Aluisio in examining the implications of the modern diet for our personal health and for our planet. This fast-paced presentation will include hundreds of images and stories from scores of countries covered in the duo's award-winning books.

11/5 - Turning Oppression into Opportunity – An Evening with Nicholas Kristof

Nicholas Kristof – New York Times columnist; co-author, Half the Sky: Turning Oppression into Opportunity for Women Worldwide
6:30 p.m. – 7:30 p.m. @ Ronald Tutor Campus Center - Ballroom

The USC Institute for Global Health, USC Program Board Speakers Committee and USC Spectrum have teamed up to invite *New York Times* columnist and two-time Pulitzer Prize winner Nicholas Kristof to speak on campus. Visit globalhealth.usc.edu for more details. Follow Kristof at [Facebook.com/kristof](https://www.facebook.com/kristof) and [Twitter.com/NickKristof](https://twitter.com/NickKristof).

11/28 - The State of Sexual and Reproductive Health and Rights Today: Research, Policies and Programs from Around the World

Sexual and Reproductive Health and Rights Network Panel
2:00 p.m. – 5:00 p.m. @ Ronald Tutor Campus Center - The Forum

It is not only in the United States that sexual and reproductive health and rights are in jeopardy. In this panel discussion, leading academics and activists from around the globe working in this area will present the state of sexual and reproductive health and rights today, focusing on opportunities and challenges in each region of the world, and discuss global developments and proposed approaches going forward.

SPRING 2013

2/21 - Entrepreneurial Approaches to Global Health Challenges

Jacqueline Novogratz – Founder, Acumen Fund
12:00 p.m. – 1:30 p.m. @ Ronald Tutor Campus Center - The Forum

Despite headway on a few fronts such as polio and AIDS treatment, global health challenges continue to take a toll, from the billions without access to clean water and adequate sanitation to the millions of women who give birth without skilled attendants. Yet too often we think governments and aid organizations alone are responsible for addressing these challenges. How can entrepreneurs use the market to have an impact on global health? And how can they work with government, corporations and civil society to create more effective systemic solutions? Jacqueline Novogratz, founder of Acumen Fund, a social investment fund operating in India, Pakistan, and across Africa that has reached over 90 million people through its 70 portfolio companies, will address these questions with examples from Acumen's experiences working in low-income markets. Her presentation will challenge the audience to think about the role they can each play in building a more inclusive, healthy future for us all.

3/26 - From Policy to Implementation – Challenges in the Field

Joel Lamstein – Founder & President, John Snow, Inc.
12:00 p.m. – 1:30 p.m. @ Ronald Tutor Campus Center - The Forum

In international development and global health there is a wide gap between what academic research and policy makers support and what the field realities dictate. This lecture by Joel Lamstein will outline those differences and explore how to this gap might be bridged in order to develop more effective evidenced-based interventions.

4/30 - Story of a Smile: The Journey of Operation Smile

William Magee, Jr. – Co-Founder, CEO, Operation Smile
12:00 p.m. – 1:30 p.m. @ Ronald Tutor Campus Center - The Forum

Children are a universal language—and this language has the power to unite people and nations. Join Dr. Bill Magee, a leading plastic and craniofacial surgeon, as he shares his journey through his organization, Operation Smile, a worldwide medical charity that delivers safe, effective surgical care to children suffering from cleft lip, cleft palate or other facial deformities. Magee will discuss the organization's history and his inspiration to build a global medical charity committed to helping children around the world.
